USfalcon is a Service-Disabled Veteran-Owned Small Business (SDVOSB) and the Pool 6 prime contractor currently executing OASIS task orders across the Department of Defense. The largest task orders are in support of the Air Force at Wright-Patterson AFB, Ohio, Tinker AFB, Oklahoma and the Army at Joint Base Langley-Eustis, Virginia. USfalcon brings a wealth of experience and knowledge of aircraft maintenance and retrofit for both fixed and rotary wing aircraft. USfalcon is a worldwide provider of mission critical professional, engineering, and information technology services in support of our Government and business partner clients. These contracts use specialized personnel performing an array of highly classified, technically demanding efforts in the Security and Cyber Support arena. USfalcon has a robust security team with over 75% of our employees having security clearances, and 50% of the company with top secret clearances. The Defense Security Service (DSS) has rated USfalcon "Superior" in two recent security audits. USfalcon also provides mission systems engineering solutions that include system design and development, systems engineering, system integration, system administration, modeling and simulation, test and evaluation, exercise support, field service rep, and special projects; and cyber security, network operations, counter-intrusion support, penetration testing and network simulation, accreditation and certification, information technology modernization, virtualization, enterprise system development, software applications development, and help desk services.
